Name and content of hazardous substances in products

产品中有害物质的名称及含量:

Hazardous substances / 有害物质

Part name / 部件名称	Lead / 铅 (Pb)	Mercury / 汞 (Hg)	Cadmium / 镉 (Cd)	Hexavalent Chromium 六价铬 (Cr6)	Polybrominated Biphenyls 多溴联苯 (PBB)	Polybrominated Diphenyl ethers / 多溴二苯醚 (PBDE)
Elektronik Bord / 电子板	X	0	0	0	0	0

This table is prepared in accordance with the provisions of SJ / T 11364 / 本表格依据SJ/T 11364 的规定编制。

0: indicates that said hazardous substance contained in all of the homogeneous materials for this part is below the limit requirement of GB / T 26572.
0:表示该有害物质在该部件所有均质材料中的含量均在 GB/T 26572 规定的限量要求以下。

X: indicates that said hazardous substance contained in at least one of the homogeneous materials used for this part is above the limit requirement of GB / T 26572.
X:表示该有害物质至少在该部件的某一均质材料中的含量超出GB/T 26572 规定的限量要求。

Electrical devices may only be installed and assembled by a qualified electrician in accordance with the relevant installation standards, guidelines, regulations, directives, safety and accident prevention regulations of the country.

Failure to comply with these installation instructions may result in damage to the device, fire or other hazards.

DALI is FELV (Functional Extra Low Voltage). During installation, ensure a safe separation (min. 4 mm) of KNX cable between DALI and mains voltage. DALI and mains voltage supply can be routed in a common cable.

These instructions are an integral component of the product and must be retained by the end user.

Design and layout of the device

- ① Button panel for manual operation
- ② Programming button and LED
- ③ KNX bus connection terminal
- ④ DALI channel display
- ⑤ Connection, 230 V ~ supply voltage
- ⑥ DALI output 1
- ⑦ DALI output 2 (only for TYFS672D device)

Electrical connection

Danger

Electric shock when live parts are touched!
An electric shock can lead to death!
● Isolate all connection cables before working on the device and cover any live parts in the area!

Geräteaufbau

- ① Tastenfeld für Handbedienung
- ② Programmertaste und -LED
- ③ KNX Busanschlussklemme
- ④ Anzeige des DALI-Kanals
- ⑤ Anschluss Versorgungsspannung 230 V ~
- ⑥ DALI-Ausgang 1
- ⑦ DALI-Ausgang 2 (nur bei Gerät TYFS672D)

Elektrischer Anschluss

Gefahr

Elektrischer Schlag bei Berühren spannungsführender Teile!
Elektrischer Schlag kann zum Tod führen!
● Vor Arbeiten am Gerät Anschlussleitungen freischalten und spannungsführende Teile in der Umgebung abdecken!

Commissioning

For detailed information on commissioning in the system link, KNX Secure mode or the DALI commissioning software, please see the product-specific QR code.

Technical data

KNX

KNX Medium TP1-256
Supply voltage KNX 21...32 V SELV
Current consumption KNX 4,5...5,0 mA

Power supply

Rated voltage AC/DC 110 ... 240 V 50/60 Hz
Power dissipation max. 3 W
Surge voltage 2 kV

DALI

- Rated voltage DALI DC 16 V (typ.)
- Output current per DALI system typ. 128 mA, max. 250 mA short-term
- Guaranteed bus current per DALI system 148 mA
- Number of DALI devices max. 64 per DALI system

Environmental conditions

Operating temperature -5° ... +45°C
Operating altitude max. 2000 m
Degree of contamination 2
Dimension 4 modules, 4 x 17.5 mm

Inbetriebnahme

Detaillierte Informationen zur Inbetriebnahme im Systemlink-, KNX Secure-Modus oder zur DALI-Inbetriebnahme-Software siehe produktspezifischen QR Code.

Technische Daten

KNX

KNX Medium TP1-256
Versorgungsspannung KNX 21...32 V SELV
Stromaufnahme KNX 4,5 ... 5,0 mA

Versorgung

Nennspannung AC/DC 110 ... 240 V 50/60 Hz
Verlustleistung max. 3 W
Stoßspannung 2kV

DALI

- Nennspannung DALI DC 16 V (typ.)
- Ausgangstrom je DALI-System typ. 128 mA, max. 250 mA kurzzeitig
- Garantiertes Busstrom je DALI-System 148 mA
- Anzahl DALI-Teilnehmer max. 64 je DALI-System

Umgebungsbedingungen

Betriebstemperatur -5° ... +45°C
Betriebshöhe max. 2000 m
Verschmutzungsgrad 2
Abmessung 4 TE, 4 x 17,5 mm

L'encastrement et le montage d'appareils électriques doivent être effectués uniquement par des électriciens qualifiés, dans le respect des normes d'installation, directives, dispositions et prescriptions en matière de sécurité et de prévention d'accidents en vigueur dans le pays.

Le non-respect des consignes d'installation peut entraîner des dommages sur l'appareil, un incendie ou présenter d'autres dangers.

DALI est une TBTF (très basse tension fonctionnelle). Lors de l'installation, respecter une séparation sûre (min. 4 mm) entre les câbles KNX et la DALI/tension secteur. La DALI et les conducteurs de tension secteur peuvent être acheminés dans un câble commun.

Cette notice fait partie intégrale du produit et doit être conservée par l'utilisateur final.

Composition de l'appareil

- ① Touche tactile pour la commande manuelle
- ② Bouton poussoir et LED d'adressage physique
- ③ Borne de raccordement du bus KNX
- ④ Affichage de la goulotte DALI
- ⑤ Raccordement tension d'alimentation 230 V ~
- ⑥ Sortie DALI 1
- ⑦ Sortie DALI 2 (uniquement appareil TYFS672D)

Raccordement électrique

Danger

Choc électrique en cas de contact avec les pièces sous tension !
Un choc électrique peut provoquer la mort !

- Avant d'intervenir sur l'appareil, déconnecter les câbles de raccordement et recouvrir les pièces conductrices avoisinantes !

Mise en service

Des informations détaillées sur la mise en service en mode Systemlink, KNX Secure ou sur le logiciel de mise en service DALI sont disponibles dans le code QR spécifique au produit.

Caractéristiques techniques

KNX

Média KNX TP1-256
Tension d'alimentation KNX 21...32 V SELV
Courant absorbé KNX 4,5 ... 5,0 mA

Alimentation

Tension nominale CA/CC 110 ... 240 V 50/60 Hz
Puissance dissipée max. 3 W

Tension de choc 2 kV

DALI

- Tension nominale DALI DC 16 V (typ.)
- Courant de sortie par système DALI . typ. 128 mA, max. 250 mA sur une courte durée
- Courant de bus garanti par système DALI 148 mA
- Nombre de participants DALImax. 64 par système DALI

Conditions ambiantes

Température de fonctionnement -5° ... +45°C
Altitude de fonctionnement max. 2000 m
Degré de pollution 2
Dimensions 4 TE, 4 x 17,5 mm

Alimentazione

Tensione nominale..... AC/DC 110 ... 240 V 50/60 Hz
Potenza dissipata max. 3 W
Tensione a impulsi 2 kV

DALI

- Tensione nominale DALI DC 16 V (tip.)
- Corrente di uscita per tipo di sistema DALI.....
..... 128 mA, max. 250 mA per breve tempo
- Corrente bus garantita per sistema DALI .. 148 mA
- Numero di utenti DALI .. max. 64 per sistema DALI

Condizioni ambientali

Temperatura d'esercizio -5° ... +45°C
Altitudine di esercizio max. 2000 m
Grado di inquinamento 2
Dimensioni 4 unità, 4 x 17,5 mm

Istruzioni di sicurezza

L'incasso e il montaggio di apparecchi elettrici devono essere eseguiti esclusivamente da un installatore qualificato in base alle norme di installazione, alle direttive, alle condizioni e ai provvedimenti di sicurezza e prevenzione degli incidenti in vigore nel paese.

Il mancato rispetto delle istruzioni per l'installazione può provocare danni all'apparecchio, incendi o altri pericoli.

DALI è FELV (sistema a bassissima tensione funzionale). Durante l'installazione, garantire una separazione sicura (min. 4 mm) delle linee KNX dal DALI/dalla tensione di rete. I cavi del DALI e quelli della tensione di rete possono essere posati in una linea comune.

Queste istruzioni per l'uso sono parte integrante del prodotto e devono restare in possesso dell'utilizzatore finale.

Struttura apparecchio

- ① Tastiera per il comando manuale
- ② Tasto e LED di programmazione
- ③ Morsetto di collegamento bus KNX
- ④ Visualizzazione del canale DALI
- ⑤ Collegamento tensione di alimentazione da 230 V ~
- ⑥ Uscita DALI 1
- ⑦ Uscita DALI 2 (solo nell'apparecchio TYFS672D)

Collegamento elettrico

Pericolo

Scosse elettriche in caso di contatto con componenti sotto tensione!

Le scosse elettriche possono provocare la morte!

- Prima di svolgere i lavori sull'apparecchio disinserire le linee di allacciamento e coprire i componenti sotto tensione nella zona circostante!

Messa in funzione

Per informazioni dettagliate sulla messa in servizio in Systemlink, in modalità KNX Secure o sul software di messa in servizio DALI, consultare il codice QR specifico del prodotto.

Dati tecnici

KNX

Supporto KNX TP1-256
Tensione di alimentazione KNX 21...32 V SELV
Corrente assorbita KNX 4,5 ... 5,0 mA

Alimentazione

Tensione nominale..... AC/DC 110 ... 240 V 50/60 Hz
Potenza dissipata max. 3 W
Tensione a impulsi 2 kV

DALI

- Tensione nominale DALI DC 16 V (tip.)
- Corrente di uscita per tipo di sistema DALI.....
..... 128 mA, max. 250 mA per breve tempo
- Corrente bus garantita per sistema DALI .. 148 mA
- Numero di utenti DALI .. max. 64 per sistema DALI

Condizioni ambientali

Temperatura d'esercizio -5° ... +45°C
Altitudine di esercizio max. 2000 m
Grado di inquinamento 2
Dimensioni 4 unità, 4 x 17,5 mm

Veiligheidsinstructies

Inbouw en montage van elektrische apparatuur mogen alleen door een elektricien worden uitgevoerd conform de toepasselijke installatieregels, richtlijnen, voorschriften, bepalingen en voorschriften ter voorkoming van ongevallen van het betreffende land.

Bij het niet naleven van de installatie-instructies kan schade aan het apparaat, brand of andere gevaren optreden.

DALI is FELV (functionele extra-lage spanning). Houd bij installatie een veilige afscheiding (min. 4 mm) vanaf KNX-leidingen tot DALI/netspanning aan. DALI en netspanningskabels kunnen door een gezamenlijke leiding worden geleid.

Deze handleiding maakt deel uit van het product en dient in het bezit van de eindgebruiker te blijven.

Opbouw van het apparaat

- ① Toetsenpaneel voor handbediening
- ② Programmeertoets en -led
- ③ KNX-busaansluitklem
- ④ Weergave van het DALI-kanaal
- ⑤ Aansluiting voedingsspanning 230 V ~
- ⑥ DALI-uitgang 1
- ⑦ DALI-uitgang 2 (alleen bij apparaat TYFS672D)

Elektrische aansluiting

Gevaar

Gevaar voor elektrische schok bij aanraking van spanningvoerende delen!

Elektrische schokken kunnen de dood tot gevolg hebben!

- Voorafgaand aan werkzaamheden aan het apparaat de aansluiteleider loskoppelen en spanningvoerende delen in de omgeving afdekken!

Ingebruikname

Voor gedetailleerde informatie over de ingebruikname in de Systemlink-, KNX Secure-modus of over DALI-ingebuiknamesoftware zie product-specifiche QR-code.

Afmeting 4 TE, 4 x 17,5 mm

Instruções de segurança

A instalação e a montagem de aparelhos elétricos só podem ser executadas por um eletricista especializado, de acordo com as normas de instalação, diretrizes, disposições, normas de segurança e instruções relativas à prevenção de acidentes em vigor no país.

A não observância das instruções de instalação pode originar danos no aparelho, incêndios ou outros perigos.

DALI é FELV (tensão funcional extra baixa). Durante a instalação, assegurar uma separação segura (mín. 4 mm) das linhas KNX do DALI/ tensão de rede. O DALI e os fios de tensão de rede podem ser conduzidos num cabo comum.

Este manual é um componente do produto e tem de ficar na posse do cliente final.

Constituição do produto

- ① Teclado para operação manual

- ② Botão de programação e LED

- ③ Borne de ligação de Bus KNX

- ④ Indicação do canal DALI

- ⑤ Ligação da tensão de alimentação 230 V ~

- ⑥ Saída DALI 1

- ⑦ Saída DALI 2 (apenas no aparelho TYFS672D)

Ligaçao elétrica

Perigo

Choque elétrico ao tocar em peças sob tensão!

O choque elétrico pode levar à morte!

- Antes de realizar trabalhos no aparelho, desligar os cabos de ligação e cobrir as peças sob tensão que se encontram por perto!

Para obter informações detalhadas sobre a colocação em funcionamento no Systemlink, no modo KNX Secure ou no software de colocação em funcionamento DALI, consulte o código QR específico do produto.

إرشادات السلامة

ينبغي ألا يتم تركيب وتجميع الأجهزة الكهربائية إلا بواسطة كهربائي مؤهل، ووفقاً لمعايير التثبيت، والتوجيهات، والقواعد، وللوائح السلامة والوقاية من الحوادث، المطبقة في بلد التركيب. في حالة عدم الامتثال لإرشادات التثبيت يمكن أن يتعرض الجهاز للضرر أو ينشب حريق أو تحدث أي مخاطر أخرى.

يتميز DALI بجهد شديد الانخفاض وظيفي (FELV). عند التثبيت، يجب الالتزام بفصل آمن (لا يقل عن ٤ مم) بين خطوط DALI و DALI / KNX / جهد شبكة الكهرباء. يمكن توجيه DALI وأسلامك جهد شبكة الكهرباء في خط مشترك. يُعد هذا الدليل عنصراً من عناصر المنتج، ويجب أن يظل مع العميل النهائي.

安装与电气连接

危险

触碰带电部件可能会被电击！

电击会导致死亡！

- 在设备上进行作业之前，应切断连接线缆，并盖住周围的带电部件！

خطير
خطر التعرض لصدمة كهربائية عند لمس الأجزاء الموصولة للجهد الكهربائي!
الصدمة الكهربائية يمكن أن تؤدي إلى الموت!
• افصل كابلات التوصيل قبل العمل على الجهاز، وقم بتغطية أي أجزاء محاطة موصلة للجهد الكهربائي!
